

2015-07-16 CGSync Meeting notes

Date

 16 Jul 2015

Attendees

- [Thomas Cherry](#)

Agenda

- GCMD is in the process identifying the things we need based on our stoplights.
- GCMD has compiled a list of prioritized fields needed for curation.

Questions

- Is OpenSearch support in the Raytheon MVP for CMR?
 - ask in another meeting
- Which fields will be included in the JSON/UMM-C record response for collection level metadata?
 - answered 7/12
- Is there JSON search documentation? When will it be available?
 - answered 7/12
- Temporal Search: there are different search combinations - what are the current plans for support of the different combinations?
- What are the plans for fielded search?
- Here (attachment pending) is our identified list of commonly updated fields. Are are your plans to update these fields?
- when will **CMR-1422** be worked on
- do any documentation pages show which fields we can do wild card searches on or all all fielded fields support this?
 - all do, use: {"provider": { "value": "LP*", "pattern": true}}, assumed for 'keyword'
